

# STALLION TURF

The Future of Equine Surfaces  
by Standard Turf

**STANDARD  
TURF**

## **A Smarter Ground Built for Trust**

Horses rely on steady footing every day. Stallion Turf is a synthetic grass system created exclusively for equestrian a surface that feels safe, consistent, and reliable under hoof for both horses and riders alike. It's more than grass on the surface. Beneath the turf sits a structured base and an impact-absorbing pad, creating a stable foundation that supports movement and reduces strain.

## **Clear Advantages for Equine Facilities**

### **Safe Movement**

Developed to support a horse's natural movement, the surface is firm, stable, and slip-resistant, helping protect joints and reducing the risk of falls in high-use areas.

### **Cleaner Environments**

Antimicrobial protection is built into every blade of yarn to promote a cleaner, fresher environment. Ideal for high traffic zones, this helps keep barns, walkways, and training spaces easier to maintain.

### **Low Upkeep**

Stallion Turf is designed to eliminate problem areas such as rutted paths or muddy gateways. Regardless of the weather conditions, Stallion Turf stays looking sharp all year round with far less daily maintenance.

### **Lasting Strength**

Every layer is designed to withstand the weight, impact, and wear that come with equestrian use.

## Where It Works Best

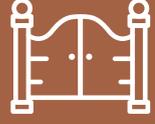

STABLE AISLES  
AND BARN

TRAINING AND  
REHABILITATION  
FACILITIES

BRIDLE PATHS  
AND WALKWAYS

GATEWAYS AND  
ENTRANCES

## Revolutionary Surfacing for horses

## The Standard Turf Approach

At Standard Turf, surfaces are built with purpose. Stallion Turf was created for equestrian spaces after listening to trainers, riders, and facility managers. The result is a product shaped by the real needs of horses and the people who care for them.
